This year with a nursery area expansion of about 30% and many new facilities including a new packing and grading building more than twice as large as the old one, we will make every effort to deliver top quality nursery stock, properly packed, to conform with your planting schedule.

Next year, pending the completion of an irrigation project, we will bring another 20 acres into production.

As indicated by this list, whenever improved methods reduce our production costs on an item, we will pass on the saving to our customers.
